Phoenix DryMAX XL - XL LGR Dehumidifier

INTRODUCING THE FIRST EVER ULTRA-PORTABLE XL LGR

The groundbreaking Phoenix DryMAX XL is revolutionizing the LGR dehumidifier market removing an amazing 125 PPD at AHAM while taking up only 50% of the space of the next smallest competitive XL dehumidifier. Because of its compact size, the Phoenix DryMAX XL allows restorers to fit twice the amount of XL units on their vehicle. The Phoenix DryMAX XL is also the first dehumidifier with built-in Bluetooth technology. Our free Phoenix DryLINK mobile app is included with the unit upon purchase. The unit will automatically send the psychrometric data by Bluetooth to the Phoenix DryLINK App (or an app you may already use for drying jobs), providing you with accurate readings to track performance and save time. Like our industry-leading Phoenix DryMAX and Phoenix AirMAX, the new Phoenix DryMAX XL is designed with superior stacking features and easy service access. Our patented FiveCOIL design, which includes our micro-channel condenser, allows the featherweight Phoenix DryMAX XL to pack a knock-out punch on drying performance every time.

FEATURES

- Ultra-compact design with XL performance
- Built-in Bluetooth technology
- Free Phoenix DryLINK mobile app, compatible with iOS and Android
- Quiet mode
- Industry leading graphical control panel
- Fold-down handle with wheels for transport
- FiveCOIL - Our patented five coil design with auto-adjusting fan speed for maximum LGR performance in low grain conditions
- Onboard storage for 25' power cord and 33' condensate hose
- Easy access for service
- Superior stacking
- 125 PPD at AHAM

Xactimate Code: WTRDHM>
